DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 8, drawn to buffer management with pointers and sequential access, classified in class 711, subclass 218.
 - II. Claims 9 – 16, drawn to buffer management with a wrap signal and non-sequential access, classified in class 711, subclass 154.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as FIFO buffer management. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
